

TePe Hydrating Mouthwash - Mild Apple and Peppermint

Uses

For symptoms of dry mouth, including dryness, stickiness, stringy saliva, bad breath, increased thirst, sore throat, dry lips, difficulty speaking, chewing or swallowing and changes in taste perceptions. Also for oral health problems such as caries or oral thrush.

Dosage

Fill the dosing cap (10ml), swish vigorously around the mouth for 1 minute then spit out. Use once or twice daily at a different time than toothbrushing, or as recommended by a dental professional. Also available in an unflavoured variant for more severe cases of dry mouth.

Format and Ingredients

Mouthwash containing:
Sodium Fluoride (910ppm), Betaine, Glycerine, Malic Acid,
