

Lynclear Treatment Spray

Uses

For the treatment of headlice. Kills headlice and their eggs. Suitable for adults and children over 6 months.

Dosage

Hold the spray approximately 10cm from the hair and carefully spray a sufficient quantity evenly onto dry hair, cover all of the hair and scalp. Massage well from the roots to tips, paying particular attention to the neck and the area behind the ears. Leave for 15 minutes. Apply normal shampoo all over the hair without wetting it, then add water and shampoo thoroughly. Rinse with warm water. Repeat the washing procedure, if necessary. Comb the hair with the fine toothed anti-lice comb. In order to avoid re-infestation, clean the comb after each lock with a cotton wool pad or ball and always comb from the top of the head to the bottom.

Format and Ingredients

Spray containing:
