

Nu-Seals Cardio 75

Uses

For the secondary prevention of thrombotic cerebrovascular or cardiovascular disease and following by-pass surgery.

Dosage

The advice of a doctor should be sought before commencing therapy for the first time. 16 years and over: the usual dosage for long-term use is 75-150mg once daily. In some circumstances, a higher dose may be appropriate, especially in the short term, and up to 300mg a day may be used on the advice of a doctor. Antithrombotic action: 150mg at diagnosis and 75mg daily thereafter. Tablets taken at diagnosis should be chewed in order to gain rapid absorption. Under 16 years and the elderly: not to be used, unless advised by a doctor.
