

Ultravana Period Pain Relief

Uses

Treatment for primary dysmenorrhoea (period pain) in women aged 15-50 years.

Dosage

For oral use. Swallow tablets whole with water, with or after food. Tablets should be taken as soon as the period pain starts. On the first day, take 2 tablets, then take 1 tablet 6-8 hours later if needed. If required, on the second and third day, take 1 tablet every 6-8 hours. No more than 3 tablets a day. Not to be taken for more than 3 days in any period.
