

Golden Eye Antibiotic 1%w/w Eye Ointment

Uses

For the treatment of acute bacterial conjunctivitis.

Dosage

Adults, the elderly and children 2 years and over: apply about 1cm of ointment to the affected eye(s) 3-4 times daily. If using chloramphenicol drops during the day and ointment at night, apply the ointment before going to bed. Course of treatment is 5 days. Any remaining ointment should be discarded after this.
