

TePe Hydrating Mouth Gel - Mild Peppermint

Uses

For symptoms of dry mouth, including dryness, stickiness, stringy saliva, bad breath, increased thirst, sore throat, dry lips, difficulty speaking, chewing or swallowing and changes in taste perceptions. Also for oral health problems such as caries or oral thrush.

Dosage

Place a pea sized amount of gel onto a finger or onto the tongue. Distribute throughout the mouth using the tongue. Apply multiple times daily and at bedtime as needed. In cases of severe dry mouth symptoms, rinse the mouth with water before use. Also available in an unflavoured variant for more severe cases of dry mouth.

Format and Ingredients

Mouth gel containing:
Xylitol, Betaine, Glycerine, Malic Acid,
